**Annual and Preventative Maintenance**

Remember your flute, just like your car, needs regular maintenance to keep playing at its best. Hard to play low notes, sluggish articulation, & wierd or bad intonation are all indications of leaks. Annual maintenance will clear up the periodic leaking that sneaks up on you and really stretch out the lifetime of your pads. If you keep playing on leaking pads, it will exacerbate the leaks, and eventually, the pads won't be able to be resealed. That means more down time and much more expense. You have to maintain your instrument for it to keep its value.

Now is a good time to send it in and get it back quickly.

**We are committed to faster turnaround times so you'll miss as little practice as possible.**

Give us a call before you ship your flute, and we will phone you with a prognosis as soon as it arrives.

If you'd like your instrument worked on during the time from Oct. 1 through December, please phone as soon as possible for an apointment - so we can start the work as soon as it arrives, and get it back to you quickly!

**For more info. and prices, see our website: [www.cincinnati-fluteworks.com](http://www.cincinnati-fluteworks.com)**
